

# ZEON REMNANTS ARMY LIST 0081-0085

This section contains all the datasheets that you will need in order to fight battles with your Zeon Remnants miniatures. Each datasheet includes the characteristics profiles of the unit it describes, as well as any wargear and abilities it might have. Some rules are common to several Zeon Remnants units - these are described below and referenced on the datasheets.

## PRIOR INDICES

Zeon Remnants detachments may include any non-**Character** unit from previous <Year> Zeon-affiliated indices in their army selection, replacing their <Faction> with Zeon Remnants.. Zeon Remnants may add a **Boost Pod** (see Cima Garahau AGX-04, P.2) to any non-**Character** and **Mobile Suit** unit from this or previous indices.

## ABILITIES

The following abilities are common to several Zeon Remnant units:

### Mobile Suit

This model can Fall Back in the movement phase and still shoot and/or charge in the same turn. When this model moves, it may move over enemy **Infantry** models, although it must end its move more than 1" from any enemy units. This model only gains a bonus to its save for being in cover if at least half of the model is obscured from the firer. This model gains **Titanic Presence**.

### Core Explodes

If this model is reduced to 0 wounds, roll a D6 before removing it from the battlefield. On a 6 it explodes, and each unit within 2D6" receives D6 mortal wounds.

### Titanic Presence

After attacking in melee with a chosen weapon, this model may then make 1 additional attack with each other melee weapon it is equipped with. This model counts as 10 models when determining control of an objective marker. If every model in your army shares a <Faction> keyword,

then all  models with this rule gain **Objective Secured** (see the Warhammer 40,000 Core Book).

### Rocket Booster

A rocket booster may be activated once per battle at the beginning of any of your Movement phases. When activated, it provides **Fly** until the beginning of your next Movement phase.

### Newtype

This model is considered a psyker. This model can attempt to manifest a single psychic power in each friendly psychic phase, and can attempt to deny a single psychic power in each enemy psychic phase. It may use any power from the Newtype Discipline when manifesting. Note - Newtypes do not know Smite, and do not damage other models from Perils of the Warp.

#### NEWTYPE DISCIPLINE

##### Three Times Faster

*Three Times Faster* has a warp charge value of 6. If manifested, the Newtype's unit may immediately move as if it were the Move phase. If the Newtype's unit Advanced or Advances this turn, it may still charge in the Charge phase.

##### Plot Armor

*Plot Armor* has a warp charge value of 6. If manifested, until the start of your next psychic phase, each time a model from the Newtype's unit suffers a wound or mortal wound, roll a D6; on a 5 or 6, the model does not lose a wound.

##### Combat Hypnosis

*Combat Hypnosis* has a warp charge value of 6. If manifested, the Newtype's unit can Advance and shoot this turn without suffering any penalties to their Ballistic Skill for moving and shooting Heavy weapons, or Advancing and shooting Assault weapons. In addition, the Newtype's unit can Charge this turn.

# ETERNAL WAR

# NIGHTMARE OF SOLOMON

Anavel Gato prepares for his own part of an attack on Konpeitoh, which is hosting the Naval Review. The Delaz Fleet keeps probing the enemy defenses, keeping them occupied. A defense satellite detects Gato breaking through another sector and the enemy is ordered to intercept him before he crashes the Review, firing his Mk. 82 nuclear warhead and destroying the fleet!

## THE ARMIES

Each player selects a Battle Forged army to an agreed points limit. Thematically, we suggest a Zeon Remnants Delaz Fleet army versus a Postwar EFF Albion Team army.

## THE BATTLEFIELD

Create the battlefield and set up terrain. A great deal of small to large pieces of space debris would fit the theme well for terrain.

## DEPLOYMENT

Using the Spearhead Assault deployment map, roll off to determine which player can pick one of the deployment zones for their army. Their opponent must use the other deployment zone.

The players then alternate deploying units, one at a time, starting with the player who did not pick their deployment zone. A player's models must be set up within their deployment zone. Continue setting up units until both sides have set up their army.

## FIRST TURN

The player who finished setting up their army first can choose to take the first or second turn. If they decide to take the first turn, their opponent can roll a D6; on a 6 they manage to Seize the Initiative, and they get first turn instead!

## MISSION SPECIAL RULES

### Open Space

Battles in **Open Space** require every unit to move at least 3" as part of the movement phase. Weapons that require units to remain stationary may be fired at a -2 penalty to hit. Any unit may move through any other unit due to the high speed nature of space combat, but must still end movements at least 1" away from enemy models. Units must possess the **Space** keyword to field that unit in Space battles.

## Debris Zone

When rolling to hit in the Shooting Phase, subtract 1 from the roll if the target is more than 12" away. After any movement phase where a unit moves 6" or more, that unit must take an LD check. If the unit rolls higher than its LD, it takes a Mortal Wound.

## STRATEGEMS

In this mission, the players can spend Command Points (CP) for the following additional Strategem.

### 1CP: **Defense Satellites** (Strategem)

Select an enemy unit. For the duration of your turn, your units may shoot at that unit without penalty from **Debris Zone**.

## BATTLE LENGTH

At the end of Battle Round 5, the player who had the first turn rolls a D6. On a roll of 3+, the game continues; otherwise the game is over. At the end of Battle Round 6, the player who had the second turn rolls a D6. On a roll of 4+, the game continues; otherwise the game is over. The battle automatically ends after Battle Round 7.

## VICTORY CONDITIONS

At the end of the battle, if the player who picked their Deployment Zone's Warlord has escaped from the far edge of the table (in their opponent's Deployment Zone), then they score a Major Victory. If the player who did not pick their Deployment Zone kills their opponent's Warlord, before it escapes, they score a Major Victory. If the Warlord was not killed or did not escape, then the battle is a draw.

## SOLOMON, I HAVE RETURNED!!

The player who picked their deployment zone may have their Warlord escape through the far edge of the table in their opponent's Deployment Zone. If they do so, the game ends immediately as the nuke is deployed. Their opponent's HQ units may prevent them from leaving the battlefield if they are within 6" of the Warlord - the Warlord must go another way.
