EARTH FEDERATION FORCES - THUNDERBOLT ARMY LIST

This section contains all the datasheets that you will need in order to fight battles with your Earth Federation Forces - Thunderbolt (EFF-TB) miniatures. Each datasheet includes the characteristics profiles of the unit it describes, as well as any wargear and abilities it might have. Some rules are common to several EFF-TB units - these are described below and referenced on the datasheets.

ABILITIES

The following abilities are common to several EFF-TB units:

Escape Vehicle - <Unit Type>

At any time, including if the model is reduced to 0 Wounds (as long as it does not explode), then the pilot may eject in a <Unit Type> and continue fighting. The pilot now uses the basic <Unit Type> unit, placing it within 1" of where the prior model was. The prior model is removed from the game. The new <Unit Type> model is considered part of the original unit.

Mobile Suit

This model can Fall Back in the movement phase and still shoot and/or charge in the same turn. When this model moves, it may move over enemy **Infantry** models, although it must end its move more than 1" from any enemy units. This model only gains a bonus to its save for being in cover if at least half of the model is obscured from the firer. This model gains **Titanic Presence.**

Core Explodes

If this model is reduced to 0 wounds, roll a D6 before removing it from the battlefield. On a 6 it explodes, and each unit within 2D6" receives D6 mortal wounds.

Titanic Presence

After attacking in melee with a chosen weapon, this model may then make 1 additional attack with each other melee weapon it is equipped with. This model counts as 10 models when determining control of an objective marker. If every model in your army shares a <Faction> keyword,

then all models with this rule gain **Objective Secured** (see the Warhammer 40,000 Core Book).

Vehicle Squadron

The first time this unit is set up, all models in this unit must be placed within 6" of each other. From that point onwards, each operates independently and is treated as a separate unit for all rules purposes.

Alternate Terrain

Battles in Gundam take place in a more varied set of environments than is typical for Warhammer 40k games. The following are special mission rules that affect the battlefield, and are a subset of the rules that are found in the GundamHammer 40k Codex.

Open Space

Battles in **Space** require every unit to move at least 3" as part of the movement phase. Weapons that require units to remain stationary may be fired at a -2 penalty to hit, and the unit may move no more than 3". Any unit may move through any other unit due to the high speed nature of space combat, but must still end movements at least 1" away from enemy models. Units with minimum speed requirements must still move their minimum speeds. Units must possess the **Space** keyword to field that unit in Space battles.

Lunar Surface

Battles on the Lunar Surface (or inside a colony hangar exposed to vacuum, or other comparable battlefield). Units must possess the **Space** keyword to field that unit in Lunar Surface battles. No other special rules or restrictions apply.

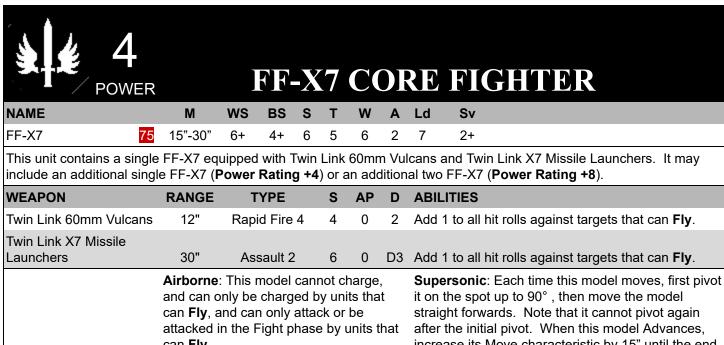

Debris Field

As **Open Space**, but after any movement phase where a unit moves 6" or more, that unit must take an LD check. If the unit rolls more than its LD, it must take a Mortal Wound.
